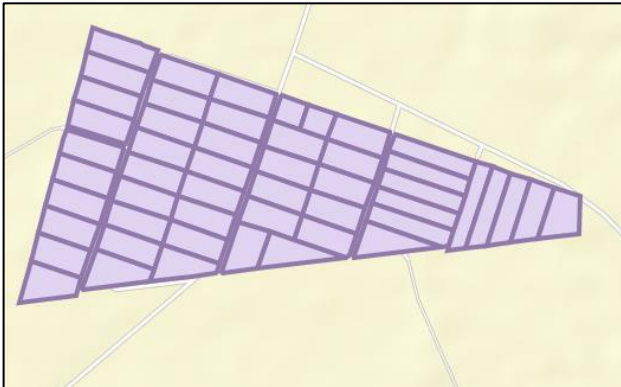

Figure 20 : Query results shown on form and on the map display

The user can click on one of the rows on the form to zoom to the exact farm that is required.

5. BASEMAP WIDGET

To change the Basemap on the map the user need to select the Basemap Widget that will open a Basemap Gallery to view which maps can be used in the background of the map. Click on the required map and the changes will show on the map.

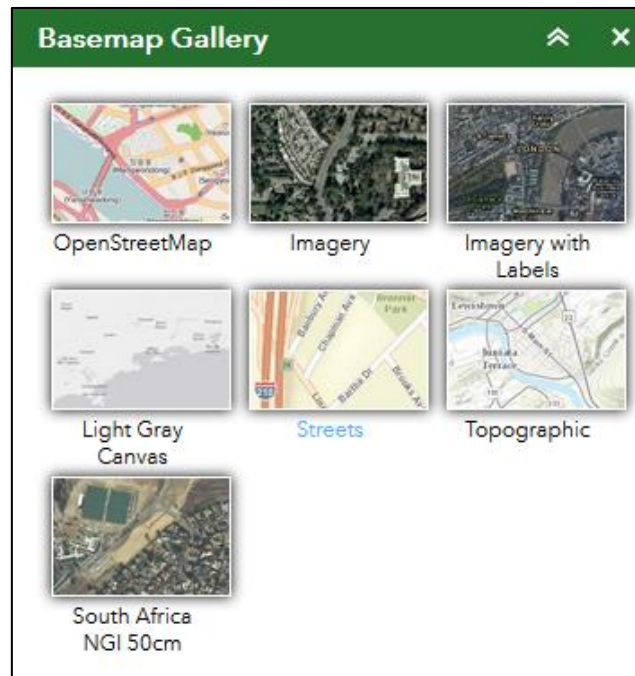

Figure 21 : Select the Basemap Widgets on top banner

6. LAYER LIST WIDGET

When the user selects the Layer list Widget that will open the list of operational layers.

Figure 22 : Select the Layer List Widgets on top banner

Note that not all the layers have a tick mark on the left, this means that that layer is not on and no data will be visible to see. Also if a layer on this list is grey out it means that a scale dependence were set on the layer and will only show when zoom in to the correct scale.

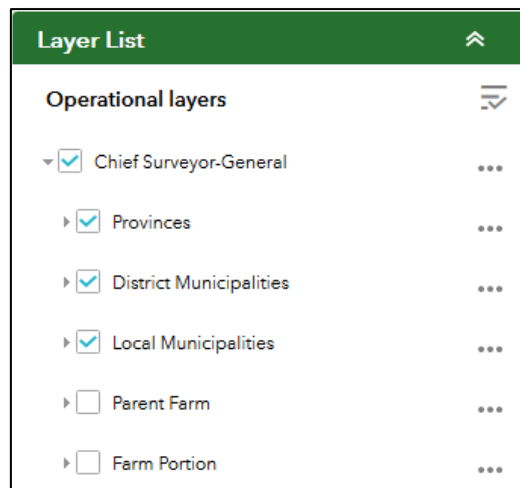

Figure 23 : Select the Layer List Widgets on top banner

Next to the CHIEF SURVEYOR-GENERAL main layer the user can click on the three dots to Zoom to, change Transparency, etc. for a specified layer.

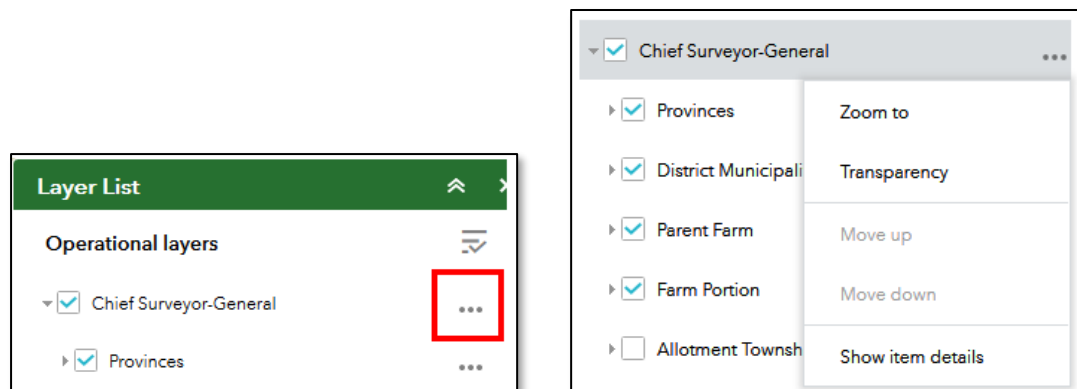

Figure 24 : Zoom or set Transparency of the specified layer

When the user clicks on three dots next to a sub layer they can disable the pop-up, view attributes or show item details.

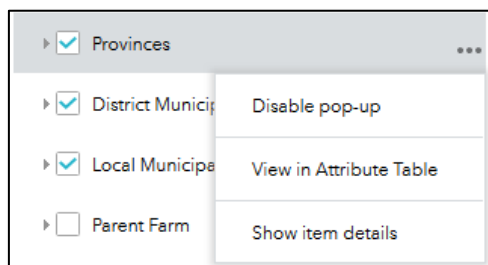

Figure 25 : Zoom or set Transparency of the specified layer

7. LEGEND WIDGET

On the third options the user can select the Legend Widget. All the layers that are switch on in the layer list will show on the Legend. For example if the user don't need to see holdings on the legend or when printing go back to the layer list option and switch that layer off. Open again the Legend and it will not show.

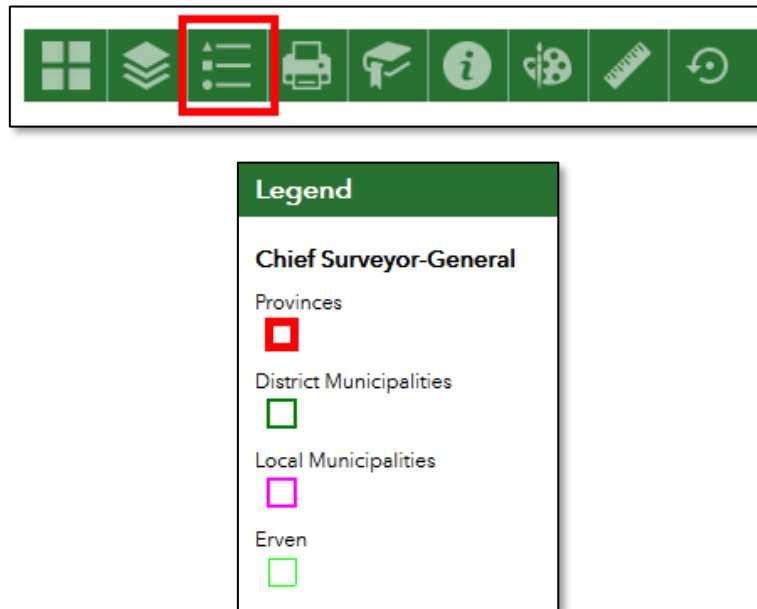

Figure 26 : Select Legend Widget and display which layers are on current on the map layout

8. SET SCALE WIDGET

Together with the Print Widget the user can also use the Set Scale Widget. Zoom to the required area and click on the Set Scale Widget. A pop-up will appear on the screen, type the value and press the Go button.

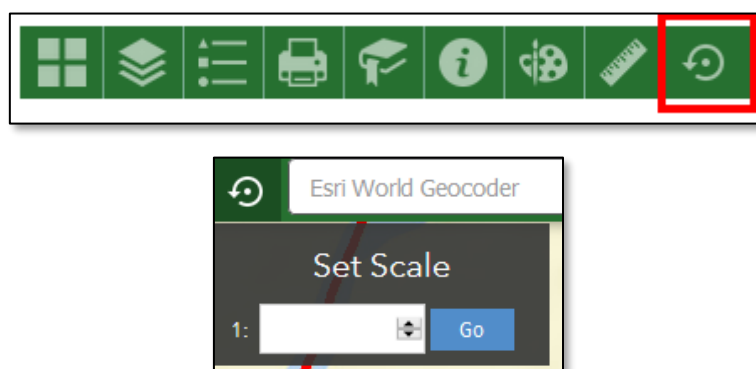

Figure 27 : Select Set Scale Widget

9. PRINT WIDGET

When done with the search of the and the user found the polygon that need to show on the map the user can use the Print Widget to create a layout. After the user clicked on the Print Widget

the Print form appears. In the Map Title space type the new heading of the map. Then select the Format option that is required. Click on the Print option to start the print process, when the new layout is created it will show on the print form. If needed navigate back to the map and zoom to correct place or change the title of the map and re-print. When needed click on the Clear prints to remove the layouts created.

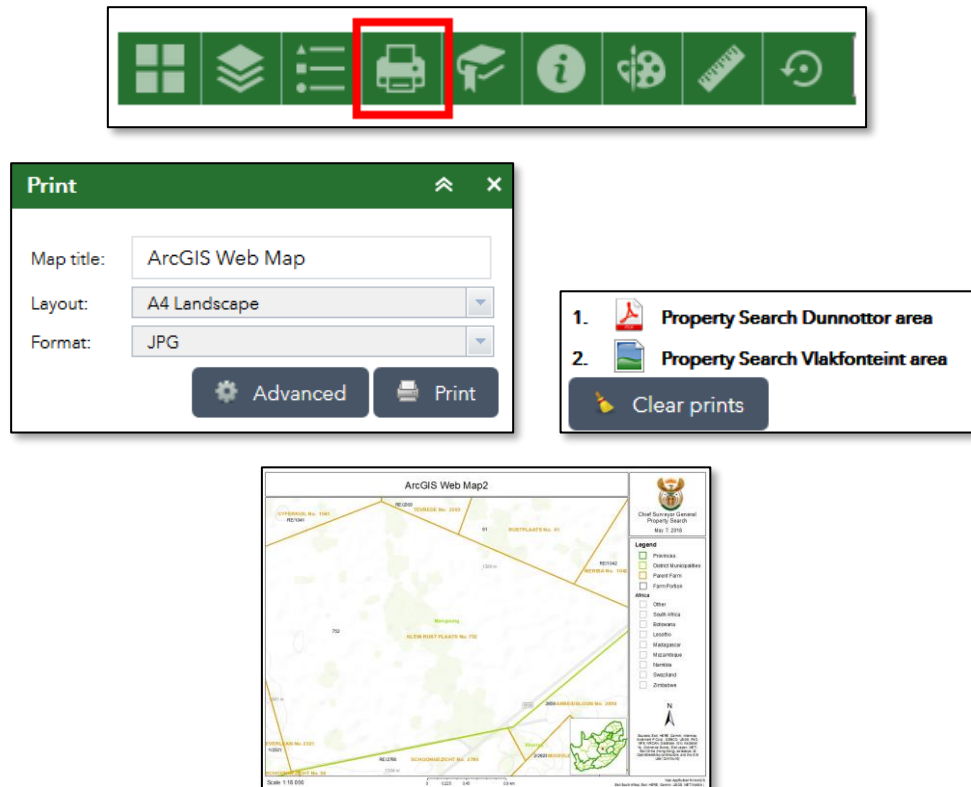

Figure 28 : Select the Print Widget type required info to create and view map layout

If the user used the Set Scale Widget and wants to use the same scale that were selected on the print layout open the ADVANCED option on the Print Widget. Select the FORCE SCALE option and type the relevant scale option. After all changes were done click the PRINT option.

Figure 29 : Set Force Scale option before printing

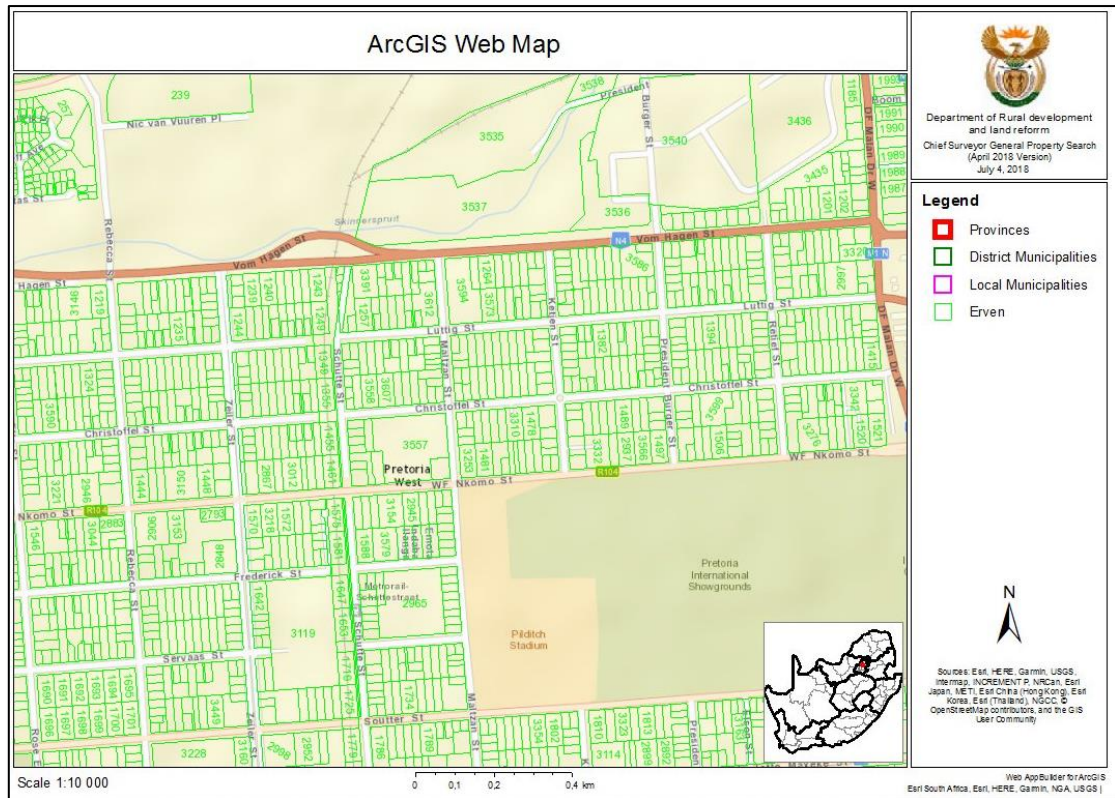

Figure 30 : A4 print example

10. BOOKMARK WIDGET

Select the Bookmark Widget. This will open the Bookmark list of already created bookmarks. To create new Bookmarks zoom to the required area open the tool and click on the Add option the new bookmark will be added on the bottom. Click to change the name and if needed the user can change the thumbnail. Note that if the user clear the cash history on the web the thumbnail will be removed.

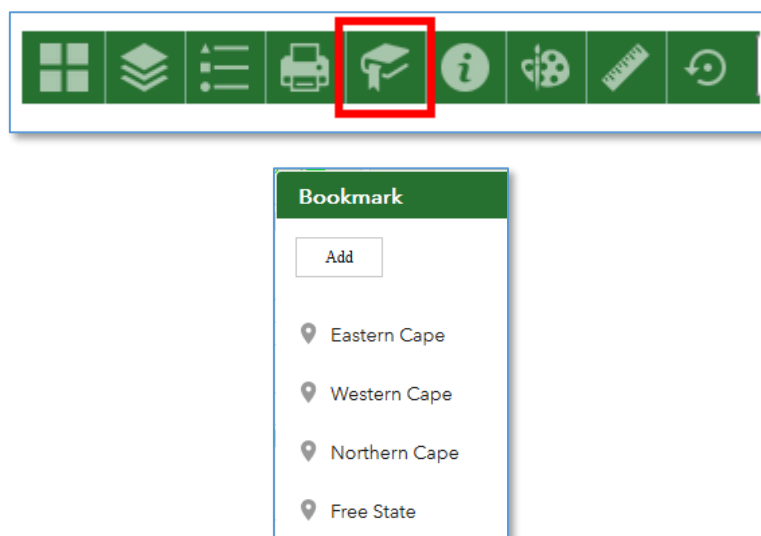

Figure 31 : Select the Bookmark Widget

11. ABOUT WIDGET
